PROFESSIONAL SUMMARY

Technically-equipped Applied AI Engineer and Quantum Developer with a professionally equipped foundation in Generative AI, Quantum Computing, Quantum Machine Learning (QML), Quantum Artificial Intelligence (QAI), Networking, and System Administration. Eager to contribute to cutting-edge, scalable, and quantum-enhanced AI solutions in a fast-paced tech environment that values innovation. Driven to apply advanced quantum-classical hybrid techniques and modern AI frameworks to streamline development, enhance computational performance, and build intelligent, high-impact applications. Seeking continuous growth by solving complex, multidisciplinary problems and delivering transformative results at the intersection of AI and Quantum Computing.

EDUCATION

B.E in Information Science, Visvesaraya Technological University 2021-2025
CGPA: 9.24

Pre-University Education, Jnanodaya Bethany PUC 2019 - 2021
Percentile : 96

SKILLS

Technical Skills	Python, Applied AI, ML, Generative AI, Quantum ML , Quantum AI
Soft Skills	Leadership, Confidence, Communication, Time Management

WORK EXPERIENCE

CEO & Co-Founder Feb 2026 – Present
PHIMIND Private Limited India

- Founded and leading PHIMIND Private Limited, building next-generation Quantum AI systems that address computational challenges beyond classical limits.
- Defining the company's strategic vision, research roadmap, and technology direction while driving product development, partnerships, and cross-disciplinary innovation.

Data Scientist June 2025 – Present
CIODS (Centre for Integrative Omics Data Science) Mangaluru, India

- Leading the development and deployment of advanced Quantum AI and ML models for biomedical and clinical omics data analysis, improving predictive performance.
- Collaborating with cross-functional teams on interdisciplinary research projects, combining omics, clinical data, and statistical models to drive translational insights and authoring technical reports

PROJECTS

Quantum Enabled Peptide Folding Framework Sep 2025

- Designed and implemented a Quantum framework for simulating peptide folding, leveraging Quantum Computing principles to predict protein conformations, optimize molecular energy landscapes, predict the conformation angles and generate the quantum circuits and enhance structural accuracy through a highly accurate Variational Quantum Eigensolver.

Small Molecule discovery for Zika Virus using Quantum AI Aug 2025 – Present

- Currently developing a hybrid quantum-classical AI framework for accelerating the discovery of small peptides. The project focuses on leveraging quantum machine learning algorithms to analyze peptide structures and predict biological activity with higher efficiency than classical methods.

Animal and Bird Intrusion Detection System

Jan 2025

- Developed a Animal and Bird Intrusion Detection System, using sound and vision to automatically identify and deter farm intrusions while supporting adaptive dataset expansion using machine learning techniques.

Memory-Augmented Meta-Learning Networks for Continual Neural Systems

Jan 2026

- Designed and implemented a memory-augmented meta-learning framework to enable continual learning in neural networks, reducing catastrophic forgetting through dynamic memory modules and task-adaptive parameter updates.

Minimum Energy Dissipation Theorem Framework

Feb 2026

- Developed a computational framework based on the Minimum Energy Dissipation Theorem to model and optimize quantum system dynamics, focusing on achieving energetically efficient state transitions and stable equilibrium configurations.

EXTRA-CURRICULAR ACTIVITIES

- **Recipient of IonQ Quantum Research Grant:** Awarded the IonQ Quantum Research Grant for Quantum Conformational Workflow of Dark Peptide Regions, with hands-on experience in developing and executing real-time quantum workflows on IonQ quantum hardware.
- **Winner of IISc Qiskit Fall Fest 2025 Hackathon:** Secured the First Place in the IISc x Qiskit Fall Fest 2025 organized by the Indian Institute of Science (IISc), Bangalore, by completing the IBM QRADAR Challenge and competing with 300+ projects nationwide.
- **Lead Speaker : IQ-BIO National Level Workshop:** Served as the Lead Speaker at the IQ-BIO National Level AI and Quantum Computing Workshop held at Kannur University, delivering sessions on advanced AI frameworks and quantum algorithmic concepts.
- **Lead Speaker - AI Innovation Bootcamp:** Delivered a one-day expert session titled “AI Innovation Bootcamp : Demystifying the AI Pipeline”, guiding participants through end-to-end AI development workflows, practical implementation strategies, and real-world innovation practices in Artificial Intelligence which was held at Yenepoya Institute of Technology.
- **Speaker (Yenepoya School of Engineering and Technology):** Delivered a session on Artificial Intelligence and Machine Learning, covering core concepts, real-world applications, and emerging trends in AI/ML to students and faculty.
- **Winner of HOPE AI National-Level Hackathon:** Secured **1st Place** in the prestigious HOPE AI Hackathon powered by Hope A.I in July 2025, as part of the CIODS AI team. The event focused on AI-driven innovation, and our solution received the highest public and jury recognition among 130+ projects nationwide in different domains.

- **Executive Member – Singularity University India Summit 2025:** Attended the prestigious SU India Summit held in Bangalore (Aug 2025), engaging with global leaders in AI, space innovation, metaverse, and exponential technologies, representing future-focused executive leadership.

INDUSTRIAL AND RESEARCH COLLABORATIONS

- **University of Edinburgh:** Engaged in multiple collaborative projects with the University of Edinburgh, including a survival analysis project, along with broader academic and research collaborations spanning interdisciplinary domains and applied problem-solving initiatives.
- **Indian Institute of Science, Bangalore:** Collaborated on quantum computing research initiatives with IISc Bangalore, contributing to joint research efforts and innovation-driven projects, along with active participation and achievements in hackathons, fostering strong academic and technical collaboration.
- **Kannur University:** Collaborated on quantum computing research initiatives, Invited Tech-talks and contributing to joint research efforts and innovation-driven projects.
- **MIT Visvaprthag, University:** Engaged in collaborative quantum computing research and broader academic partnerships, including joint research initiatives and innovation-driven projects.
